Abstract (Basic): US 6278993 B1

NOVELTY - A search function is initiated after entering the search criteria in the search function. A pre-referenced document associated with search criteria is returned in the search function. For an embedded search function in the document, a search criteria is automatically entered into the embedded search function. The search function returns the addresses of the documents found through the embedded search function.

DETAILED DESCRIPTION - An INDEPENDENT CLAIM is also included for on-line internet search application.

USE - For searching data such as photographs, **video / audio** information through data packet network (DPN) and for providing on-line services such as reservation **payment** for airline travel.

ADVANTAGE - Many **uniform resource locators** having embedded private search functions are found during initial search, thereby allows faster access to data and reduces user navigation time. Also provides a unique way for users to gain information by proxy from deeper levels of web sites without requiring exhaustive manual navigation and repeated reentering of queries to new search functions.

DESCRIPTION OF DRAWING(S) - The figure shows the process flow diagram illustrating basic search steps.

Abstract (Basic): US 6974078 B1

NOVELTY - A product related information e.g. competitive pricing
information for multiple merchants, is **retrieved** by **search** engine
from **databases** using **retrieved** product identifier. The retrieved
product related information is sent to cellular phone (10) from server
(30), in response to search query and a portion of product related
information is displayed on cellular phone.

DETAILED DESCRIPTION - INDEPENDENT CLAIMS are also included for the
following:

(1) method of obtaining competitive pricing information for
specific product;

(2) communication system for obtaining information related to
specific product; and

(3) method of obtaining personal information related to specific
product.

USE - For obtaining product related information such as competitive
pricing information for multiple merchants, product review of specific
product and locations of merchants, related **advertising**, recall
information, popularity of product and/or company, nutritional
information and recipes for food products, and personal-related
information such as usage frequency of product, using personal
communication devices (PCD) such as cellular phone, pager and palm
pilot for in-home **shopping** through **internet**.

ADVANTAGE - Allows user to obtain product related information from
multiple databases from any location easily.

DESCRIPTION OF DRAWING(S) - The figure shows an overview of an
information retrieval and communication system.

NOVELTY - A search engine searches the descriptive information about required products/services and corresponding **advertisement** information from a portable storage medium, based on commands input by a buyer. The **search result** is displayed. The portable storage medium also contains **links** to external information related to the products/services.

DETAILED DESCRIPTION - An INDEPENDENT CLAIM is included for information management system.

USE - for providing information about products/services to users for **Internet shopping**.

ADVANTAGE - Enables effectively assisting buyer in finding a required product.

Abstract (Basic): US 6996775 B1

NOVELTY - A portion of the temporal document for which related documents are to be found, is identified. The text associated with different time portion of temporal document identified is selected. Each term on the selected text is weighted by a function $W(t)$ to find the related documents according to the occurrence time (t) of the term that occurs relative to the time at which the signal of interest occurs.

DETAILED DESCRIPTION - An INDEPENDENT CLAIM is also included for device for **retrieving** web pages.

USE - For **retrieving web pages** of user interest **relating** to temporal material e.g. **video** and **audio** programming such as **movies**, news programs, weather, sports scores, sports events, etc.

ADVANTAGE - Enables user to obtain desired web page, easily.
